### Congress Debates Consumer Prices

CAPITOL HILL (UPI) - Heated discussion marked the House floor today as Congress debated the state of consumer prices. Many congressmen complained that the average American just can't afford a new house at today's price of \$3,915.00.

Split along party lines, many Republicans felt that fourteen cents for a half gallon of milk was a solid consumer bargain, while Democrats pointed out that eighteen cents for a pound of bacon was too expensive for many. Since the average U.S. worker now earns a record annual wage of \$540.00, many members of the House felt that four cents for a loaf of bread was quite affordable.

President Theodore Roosevelt noted that while ten pounds of potatoes had risen to seventeen cents, he said that the American public had, in 1904, more buying power than ever before.
